

Wrting your own: wrapping simple calls

```
suspend fun View.awaitOneClick() = try {
```

```
} finally {
```

```
}
```

} finally }

`suspend fun View.awaitOneClick() == try {`

suspended *Can* *1* *lab* *1* *le* *Con* *ut* *in* *e* *<* *Unit* *>* *{* *continuation* *-* *>*

`suspend fun View.awaitOneClick() == try {`
