

**Let's make your codebase
more readable!**

And give unfiltered feedback 🙌

Thank you.

Making any codebase more readable with Kotlin coroutines

[Click here to directly access useful links](#)

Note: Since this presentation is 138 slides long, with animations, I made it looping.
That way, you can use the left arrow key to reach the end from here.
Click the right arrow key 139 times and you will see this slide again.
