

@Louis_CAD

Writing your own composition

```
suspend fun wasteTime() {  
    repeat(times = 10) {  
        delay(timeMillis = 16)  
    }  
}
```

Integration is easy!

**No need to pass a
Runnable!**

Cancellable?

Yes, because delay is!

Writing your own: composition

```
 suspend fun wasteTime() {  
    repeat(times = 10) {  
        delay(timeMillis = 16)  
    }  
}
```

Integration is easy!

No need to pass a
Runnable!

Cancelable?

Yes, because delay is!
