Structured concurrency

Structured concurrency

```kotlin
suspend fun loadImage(name: String): Image { … }

suspend fun loadAndCombine(name1: String, name2: String): Image =
    coroutineScope {   this: CoroutineScope
        val deferred1 = async { loadImage(name1) }
        val deferred2 = async { loadImage(name2) }
        combineImages(deferred1.await(), deferred2.await())
    }
```
