@Louis_CAD

```kotlin
override fun onCreate(savedInstanceState: Bundle?) {
    super.onCreate(savedInstanceState)
    //TODO: Set the content view

    delay(1000)
```

Available now in **Splitties ("Lifecycle coroutines")**

coming soon™ in AndroidX lifecycle-ktx

**Defaults to Dispatchers.Main***

Cancels children when destroyed 👌

*plus a performance fix for Splitties version

```kotlin
    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
        //TODO: Set the content view

        delay(1000)
```

```kotlin
override fun onCreate(savedInstanceState: Bundle?) {
    super.onCreate(savedInstanceState)
    //TODO: Set the content view
    |
    delay(1000)
```

Defaults to Dispatchers.Main*

Cancels children when destroyed 👌   **Available now in Splitties ("Lifecycle coroutines")**

coming soon™ in AndroidX lifecycle-ktx

@Louis_CAD

*plus a performance fix for Splitties version

```kotlin
// Usage in Fragments

viewLifecycleOwner.lifecycle.coroutineScope
viewLifecycleOwner.lifecycleScope // Shortcut for above
```
